

Salla Syria

Simple Testing Checklist

Testing site: <https://sallasyria-production.sallasyria.workers.dev>

Tick each box when it behaves as described. Any box that behaves differently is a fail - note what you did and what you saw.

Before you start:

- ☐ Prepare 2 merchant accounts (A and B) and 1 admin account.
- ☐ For every test use new data (new email, new phone, new shop name) so old data does not block you.

Accounts

☐ Register a new merchant account

- Do: Create a new account with name, email, phone, password.
- Expected: Account created, then you must confirm your email before you can log in.

☐ Confirm email

- Do: Open the confirmation mail and press the link.
- Expected: Email confirmed.

☐ Log in

- Do: Log in with email + password.
- Expected: You enter the system.

☐ Log in with wrong password

- Do: Try a wrong password.
- Expected: Clear login error, no entry.

☐ Wrong email and wrong password look the same

- Do: Try unknown email, then wrong password.
- Expected: Same error message both times.

☐ View my profile

- Do: Open my profile.
- Expected: Your name, email, phone.

☐ Change my name

- Do: Change name only.
- Expected: Name updated, you stay logged in.

☐ Change phone / email

- Do: Change phone, enter current password.
- Expected: Updated; other devices logged out.

☐ Change password

- Do: Change password with current password.
- Expected: Success, other devices logged out.

☐ Log out from other devices

- Do: Log in on 2 browsers, log out others from one.
- Expected: Second browser logged out.

☐ Log out

- Do: Log out, try to open profile.
- Expected: Blocked, must log in again.

[] Forgot password

Do: Request password reset, open reset mail, set new password.

Expected: Password changed, all devices logged out, old reset link stops working.

Shops

[] My shops list

Do: Open shops as merchant A.

Expected: Only your shops.

[] Create shop

Do: Create shop with name + simple web address.

Expected: Shop created.

[] Duplicate web address blocked

Do: Create 2 shops with same web address.

Expected: Second one rejected.

[] Open my shop

Do: Open your shop details.

Expected: Shop data shown.

[] Cannot see other merchant's shop

Do: As merchant B try to open A's shop.

Expected: Not found.

[] Edit shop

Do: Change shop name.

Expected: Updated.

Categories

[] Create category

Do: Add category to your shop.

Expected: Category created.

[] Create sub-category

Do: Add category inside another one.

Expected: Linked correctly.

[] Duplicate category blocked

Do: Same web address twice.

Expected: Rejected.

[] Edit category

Do: Rename category.

Expected: Updated.

[] Delete category with products blocked

Do: Delete category that has products.

Expected: Blocked with clear message.

[] Delete category and release products

Do: Delete with "release products" option.

Expected: Category deleted, products stay in shop.

Products

[] Add product

Do: Add product with name, price, quantity, category.

Expected: Product created.

[] Duplicate product blocked

Do: Same web address twice.

Expected: Rejected.

[] View products

Do: Open product list + one product.

Expected: Correct data.

[] Edit product

Do: Change price / quantity.

Expected: Updated.

[] Remove product

Do: Remove product.

Expected: Disappears from sale but old orders keep it.

[] Reuse address after removal

Do: Create new product with old address.

Expected: Allowed.

[] Bring back removed product

Do: Restore it.

Expected: Back on sale; blocked if address now used by another product.

Product pictures

[] Add picture by link

Do: Attach a picture link to a product.

Expected: Picture saved.

[] Bad link rejected

Do: Attach non-secure link.

Expected: Rejected.

[] View pictures

Do: Open product pictures.

Expected: Pictures in order.

[] Edit / remove / restore picture

Do: Do each action.

Expected: Works and reflects on product.

[] Upload picture file (production)

Do: Try uploading a file.

Expected: Clear message that file storage is not enabled on this test version.

Customers

[] Add customer

Do: Add customer with name + phone.

Expected: Customer saved.

[] Same phone updates same customer

Do: Add same phone with new name.

Expected: Same customer updated, no duplicate.

[] Same phone in another shop is separate

Do: Add same phone to another shop.

Expected: New separate customer.

[] Edit customer

Do: Change customer data.

Expected: Updated.

[] Delete customer with orders blocked

Do: Delete customer who ordered.

Expected: Blocked to protect order history.

[] Delete clean customer

Do: Delete customer with no orders.

Expected: Deleted.

Delivery addresses

[] Save address

Do: Save address for a customer (name, phone, city, full address).

Expected: Saved.

[] Wrong city rejected

Do: Use city outside list.

Expected: Rejected.

[] View addresses

Do: Open customer addresses.

Expected: Correct list.

[] Edit address

Do: Change address text.

Expected: Updated.

[] Set default address

Do: Mark one of two addresses as default.

Expected: Only one default at a time.

[] Delete address

Do: Delete address.

Expected: Deleted, old orders unchanged.

Delivery prices

[] View delivery prices

Do: Open delivery prices (no login needed).

Expected: List per city.

[] Add delivery price

Do: Add price for a city.

Expected: Saved.

[] Duplicate city price blocked

Do: Same city twice.

Expected: Rejected.

[] Edit / delete price

Do: Change price, then delete.

Expected: Works, old orders unchanged.

Ordering + order management

[] Place order

Do: Buy 1 product as a customer (name, phone, address, cash on delivery).

Expected: Order created with order number, stock decreased.

[] Double-click creates one order only

Do: Send same order twice by mistake.

Expected: Same single order, no duplicate.

[] Prices come from system

Do: Try to send your own total.

Expected: Rejected, system calculates price.

[] Out-of-stock blocked

Do: Order more than available.

Expected: Blocked.

[] Inactive product blocked

Do: Order removed product.

Expected: Blocked.

[] View orders

Do: Open orders list + one order.

Expected: Newest first, full details with prices.

[] Order status flow

Do: Move order step by step: new > confirmed > preparing > shipped > delivered.

Expected: Each step works.

[] Wrong status jump blocked

Do: Jump new > shipped directly.

Expected: Blocked.

[] Payment status flow

Do: Unpaid > paid > refunded.

Expected: Works; wrong jumps blocked.

Plans and subscriptions (admin)

[] View available plans

Do: Open plans list (no login).

Expected: Plans with prices.

[] Give shop a subscription

Do: As admin, activate plan for shop.

Expected: Shop can now sell.

[] Double subscription blocked

Do: Activate twice.

Expected: Rejected until cancel.

[] Renew / cancel subscription

Do: Renew then cancel.

Expected: History kept, cancel works twice safely.

[] Shop without subscription cannot sell

Do: Try adding product or ordering on expired shop.

Expected: Blocked for merchant.

[] Admin resets user password

Do: As admin reset merchant password.

Expected: Changed, user logged out everywhere.

General

[] Testing page opens

Do: Open the testing page.

Expected: All sections load.

[] Wrong page shows clean error

Do: Open a wrong link.

Expected: Clear "not found" message.

[] Shop data never leaks

Do: As merchant B try to open A's products / orders / customers.

Expected: Not found everywhere.

Done when: every box is ticked. Any deviation is a fail - note the item name, what you did, and what you saw.
